

Table of Contents

Executive Summary

Summary of vision, goals, objectives, strategies, performance measures/levels of service and schedule

Chapter 1 – Introduction

1.1	Overall Context for Water System Plan.....	1-1
	Towards a Sustainable Future (comp plan, PW vision)	1-1
	Hydrologic Cycle	1-2
	Drinking Water Utility	1-2
	Water System Plan Purpose	1-2
1.2	Accomplishments.....	1-3
	Strategic Issues	
	Performance Management	
1.3	Planning Process	1-6
	SEPA Review	1-6
	Public Outreach/Hearing	1-7
1.4	Plan Organization	1-7

Chapter 2 – System Overview

2.1	Ownership and Management.....	2-1
	Management Structure and Service Delivery	
2.2	History	2-2
2.3	Service Area	2-2
	Environment and Land Use	2-3
	Service Area System Information	2-9
	Interties	
2.4	Facilities Inventory	2-12
	Source of Supply	2-12
	Storage	2-13
	Transmission and Distribution	2-13
	Treatment.....	

Chapter 3 – Population and Demand Forecast

3.1	Demographic Data.....	3-1
3.2	Water Use Characteristics	3-1
	Production and Peaking Factor.....	3-2
	Customer Categories and Consumption	3-5
	Non-Revenue Water and Leakage.....	3-12
	Water Use Factors and ERUs.....	3-12
3.3	Demand Forecast.....	3-13
	Demand Forecast Methodology.....	3-13
	Demand Forecast Results.....	3-14
	Demand Forecast with Climate Change Impacts	3-16

Chapter 4 – Legal and Policy Framework

4.1	Federal and State	4-1
	Water Rights	4-1
	Water Quality	4-2
	Groundwater Protection	4-3
	Water Use Efficiency.....	4-4
	Reclaimed Water	4-4
	Source Development and System Operation	4-4
	Planning and Financing Requirements.....	4-4
	Department of Health Guidance.....	4-5
4.2	Regional and Local.....	4-5
	Service Area Policies and Codes	4-6
	Related Plans	4-7

Chapter 5 - Source of Supply Program

5.1	Regulations Affecting the Source of Supply	5-2
5.2	Source Description.....	5-2
	Regional Water Sources	5-3
	Olympia’s Water Sources.....	5-5
5.3	Alternate Sources	5-8
	Water Conservation.....	5-9
	Reclaimed Water	5-9
	Water Right Changes.....	5-9
5.4	Water Rights	5-10
	Existing Water Rights.....	5-10
	Pending Water Right Applications.....	5-16
5.5	2015-2020 Source of Supply Program.....	5-19
	Objectives	
5.6	Levels of Service/Performance Measures	

Chapter 6 – Water Use Efficiency Program

6.1	Water Use Efficiency Regulations.....	6-2
-----	---------------------------------------	-----

6.2	Water Conservation Program Performance	6-3
	Total Production.....	6-3
	Distribution System Leakage	6-5
	Progress toward Water Conservation Objectives.....	6-6
	Drought Response, water shortage and service reliability	6-9
6.3	Program Development.....	6-9
	Selection of Planned Activities.....	6-9
	Assumptions Used in Cost and Water Savings Estimates	6-10
	Summary of Estimated Water Savings	6-
6.4	2009-2014 Water Conservation Program	6-11
6.5	Objectives/Strategies	
6.5	Levels of Service/Performance Measures	

Chapter 7 – Reclaimed Water Program

7.1	Reclaimed Water Regulations	7-1
7.2	Regional Reclaimed Water Use.....	7-2
	Reclaimed Water Facilities.....	7-2
	Reclaimed Water Task Force	7-3
	Distribution Infrastructure	7-4
	Future LOTT Alliance Infrastructure	7-4
7.3	Reclaimed Water Use in Olympia	7-5
	Business Plan	7-5
	Ordinance and Policies.....	7-6
	McAllister Wellfield Mitigation.....	7-6
7.4	2015-2020 Reclaimed Water Program	7-7
7.5	Objectives/Strategies	
7.6	Levels of Service/Performance Measures	

Chapter 8 – Source Protection Program

8.1	Groundwater Protection Regulations	8-2
8.2	Olympia’s Drinking Water Protection Areas.....	8-3
	Drinking Water Protection Areas	8-4
	Hydrogeology of Drinking Water Protection Areas	8-4
	Susceptibility to Contamination	8-8
	Delineations of Drinking Water Protection Areas.....	8-9
	Land Use and Zoning in Drinking Water Protection Areas	8-13
8.3	Contaminant Source Inventory	8-26
	Sources of Contamination.....	8-26
	Ranking Risk.....	8-27
8.4	Spill Response Planning.....	8-29
	First Response to Spill Events	8-29
	Utility Responsibilities	8-31
8.5	2015-2020 Groundwater Protection Program.....	8-32
8.6	Objectives/Strategies	

8.7 Levels of Service/Performance Measures

Chapter 9 – Source Infrastructure

9.1	Description of Existing Sources	9-1
	McAllister Springs	9-1
	East Olympia Area Wells.....	9-4
	Allison Springs Area Wells.....	9-5
9.2	Source Capacity Analysis	9-6
	Design Criteria.....	9-6
	Treatment facilities	
	Evaluation of Source Capacity	9-7
	Source Development Strategy	
9.3	2015-2020 Source Infrastructure Projects.....	9-16
9.4	Objectives/Strategies	
9.5	Levels of Service/Performance Measures	

Chapter 10 – Storage Infrastructure

10.1	Description of Existing Storage.....	10-1
10.2	Storage Capacity Analysis	10-1
	Design Criteria.....	10-1
	Evaluation of Storage Capacity	10-4
10.3	2015-2020 Storage Infrastructure Projects.....	10-13
10.4	Objectives/Strategies	
10.5	Levels of Service/Performance Measures	

Chapter 11 – Transmission and Distribution Infrastructure

11.1	Existing Transmission/Distribution System.....	11-1
	Transmission System.....	11-5
	Distribution System.....	11-5
	Engineering Development and Design Standards.....	
11.2	Capacity Analysis	11-8
	Design Criteria.....	11-8
	Hydraulic Model Calibration	11-9
	Evaluation of Transmission/Distribution Capacity	11-11
11.3	2015-2020 Transmission/Distribution Projects.....	11-12
11.4	Objectives/Strategies	
11.5	Levels of Service/Performance Measures	

Chapter 12 – Water Quality Program

12.1	Water Quality Regulations	12-1
	Recently Adopted Regulations	12-3
	Proposed Regulations.....	12-6

12.2	Water Quality Program Activities	12-7
	Monitoring	12-7
	Treatment	12-20
	Cross-Connection Control	12-23
	Water Quality Program Management.....	12-25
12.3	Emerging Issues	12-29
	Water Quality Impact of Transition to McAllister Wellfield	12-29
	Regulatory Changes.....	12-32
	Accumulation of Pharmaceutical Substances	12-33
	Climate Change	12-33
12.4	2015-2020 Water Quality Program.....	12-34
12.5	Objectives/Strategies	
12.6	Levels of Service/Performance Measures	

Chapter 13 – Operations and Maintenance Program

13.1	Operations and Maintenance Regulations	13-1
	Operator Certification	13-1
	Other Regulations	13-2
13.2	O&M Program Activities	13-3
	Asset Management.....	
	Energy Efficiency	
	Small Diameter Pipe Replacement	13-4
	Valve and Meter Repair, Replacement and Maintenance	
	Pump and Storage Systems	
	Treatment Facilities	
	Emergency Response, Vulnerability Assessment.....	13-7
13.3	2015-2020 O&M Program.....	13-17
13.4	Objectives/Strategies	
13.5	Levels of Service/Performance Measures	

Chapter 14 – Capital Improvement Program

14.1	Development of CIP	14-1
	Sustainable Infrastructure: <i>Envision</i> Rating	
	Project Planning and Management Systems	
	Project Prioritization.....	14-1
	Cost Estimating Methodology	14-2
	Alternative Energy Generation (in-pipe hydro, solar, wind)	
14.2	Planned Projects	14-3
	Projects Scheduled for Implementation in 2015-2020	14-3
	20-year CIP	14-13
14.3	Objectives/Strategies	
14.4	Levels of Service/Performance Measures	

Chapter 15 – Technology, Customer Service and Utility Billing

15.1	Current services and policies	14-1
	Information Technology	
	Customer Service	
	Utility Billing.....	
	Future needs	14-1
15.2	Technology, Customer Service and Utility Billing Program	14-3
15.3	Objectives/Strategies	
15.4	Levels of Service/Performance Measures	

Chapter 16 – Financial Program

16.1	Utility Financial Structure.....	16-2
	Types of Funds	16-2
	Customer Classes	16-2
	Long-term financial strategy.....	
16.2	Current Financial Status.....	16-3
	Operating Revenue and Expenses.....	16-3
	Assets and Liabilities	16-5
	2015 Budget.....	16-7
	Current Debt	16-7
16.3	Financial Policies	16-7
16.4	Potential Revenue Sources.....	16-8
	Rate Revenue	16-8
	New Development Charges	16-9
	Bond Financing.....	16-10
	Grants and Low Cost Loans	16-10
16.5	Revenue Requirements and Funding.....	16-10
	Capital Financing.....	16-11
	Operational Financing	
	Financial Forecast.....	16-12
	Rate Analysis	16-14
16.6	2015-2020 Financial Program.....	16-18
16.7	Objectives/Strategies	
16.8	Levels of Service/Performance Measures
