* LOS will be allowed to fall below adopted levels of service at these sites.
 Some types of improvements are appropriate.

Notes:

On Strategy Corridors, level of service may fall below adopted standards.
Widening may not be a solution to congestion on these streets.
Other improvements are needed for mobility.

In the downtown and along Urban Corridors LOS E will be acceptable
on arterial and major collectors. In the rest of the City and
Urban Growth Area LOS D is acceptable.

The specific alignment of the future streets shown will be determined
based on more detailed analysis during development review or
City alignment studies.

All widening projects will be built to current street standards.
