An Ordinance Revising Fees for Engineering, Building, and Land Use Permits and Plan Review and Amending Olympia Municipal Code Sections 4.04.010, 4.36.010, 4.36.020, 4.38.010, 4.40.010, 16.24.060 and 16.24.110

WHEREAS, the Development Fee Revenue Fund was created by the Olympia City Council's adoption of Ordinance No. 6983 to more accurately record the fee-supported portion of the City's costs to provide permit review and inspection services; and

WHEREAS, Ordinance No. 6983 also states that the Olympia City Council shall establish a Target Fund Balance and policies for management of the Target Fund Balance for the Development Fee Revenue Fund; and

WHEREAS, Resolution No. M-1864 established policies to manage the Development Fee Revenue Fund, including a cost recovery target of 85 percent of City costs to provide review and permit services; and

WHEREAS, the City Council adopted Ordinance No. 7306, which directed that, to ensure development permit fees continue to include consideration of the increased cost to the City to perform development review services, the City Manager propose an increase to building permit fees (excluding those based on valuation), land use planning review fees, and development engineering fees on an annual basis consistent with annual adjustments to the City's labor contracts concurrent with the City Manager's proposed annual operating budget; and

WHEREAS, there is a need to adjust development permit fees to reflect the City's updated labor contracts and to more closely align them with the target adopted in Resolution No. M-1864 for recovery of the City's cost to provide permit review and inspection services, as demonstrated by the City's analysis of development services cost recovery in 2021;

Section 2. Amendment of OMC 4.36.010. Olympia Municipal Code Section 4.36.010 of the Olympia Municipal Code is hereby amended to read as follows:

4.36.010 Building code review and permit fees

- A. The determination of value or valuation under any of the provisions of this code is made by the building official based on the valuation data established by the International Code Council under the provisions of

building standards valuation data or other supporting data. The value to be used in computing the building and building plan review fees is the total of all construction work for which the permit is issued, as well as all finish work, painting, roofing, electrical, plumbing, heating, air conditioning, elevators, fire extinguishing systems, and other permanent equipment. Single-family and duplex dwellings of wood frame construction having an area of more than 2,500 square feet per unit are valued at "good construction" rate. All others are valued at "average construction" rate. Remodels are valued based on the contract price of the project or as determined by the building official.

B. Payment of fees. A permit is not valid until the fees prescribed by law have been paid, nor may an amendment to a permit be released until the additional fee, if any, has been paid.

C. Schedule of permit fees. On buildings, structures, gas, mechanical, and plumbing systems or alterations requiring a permit, a fee for each permit must be paid as required using the current fee schedule.

D. Plan Review Fees: When submittal documents are required, a plan review fee must be paid at the time of submitting the submittal documents for plan review. The current fee schedule as adopted establishes the plan review fee. The actual permit fees and related plan review fee is determined upon completion of the plan review and the balance owing must be paid at the time of permit issuance.

The plan review fee is a separate fee from the permit fees specified in this section and are in addition to the permit fees.

When submittal documents are incomplete or changed so as to require additional plan review or when the project involves deferred submittal items, an additional plan review fee is charged at the rate shown in the current fee schedule.

E. Building permit valuations. The value to be used in computing the building permit and building plan review fees is the total value of all construction work for which the permit is issued, as well as all finish work, painting, roofing, electrical, plumbing, heating, air conditioning, elevators, fire extinguishing systems, and any other permanent equipment. Contractor's overhead and profit is also included. The Valuation factor is used in assessing the building permit for installation of Sign and Commercial Landscaping permits (plan review for Signs and Commercial landscaping will be 65% percent of the permit).

F. Investigation Fees: Work without a Permit.

1. Investigation. Whenever any work for which a permit is required by this code has been commenced without first obtaining said permit, a special investigation must be made before a permit may be issued for such work.

2. Fee. An investigation fee, in addition to the permit fee, is collected whether or not a permit is then or subsequently issued. The investigation fee is equal to the amount of the permit fee required by this code. The minimum investigation fee is the same as the minimum fee set forth in the currently adopted fee schedule. This fee is an additional, punitive fee and does not apply to any Grading or Building Permit Fee that may subsequently be issued. Payment of the investigative fee does not vest the illegal work with any legitimacy, nor does it establish any right to a Permit for continued development of that project. If the work done remains illegal for 90 days after service of the Stop Work Order, it is considered hazardous and must be abated per the Olympia Municipal Code.

3. The payment of such investigation fee does not exempt any person from compliance with all other provisions of this code nor from any penalty prescribed by law.

G. Fee Refunds.

The building official may authorize the refunding of:

1. ~~100%~~ percent of any fee erroneously paid or collected.

2. Up to ~~80%~~ percent of the permit fee paid when no work has been done under a permit issued in accordance with this code.
 3. Up to ~~80%~~ percent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any plan reviewing is done. The building official ~~shall~~ may not authorize refunding of any fee paid except on written application filed by the original permittee not later than 180 days after the date of fee payment.
- H. Fee Exempt Permits:
1. Agricultural/deer fences up to eight feet tall
