

Ways to make a better community!

By Koral Thorpe

- We could help out the homeless shelter by making more places for them to go and more buildings so they would have a place to sleep. I would help by setting up tents for them and helping the elders move from place to place. I would also ask to fix abandoned buildings so they would have more space.
- Supporting the LGBTQ+ community by putting up flags and using the right pronouns and treating them the same.
- Also supporting Black Lives Matter by also treating them the same.
- I think I should be mayor for the day because it makes me sad to see all the people not being treated fairly, I would also love to help out by making them feel included and have a better environment.
