Subject: Fw: Comprehensive Plan Comments

Hi Joyce,

I'm not sure how these made their way to me but see below for a comment on the Comprehensive Plan.

Thank you!

Stacey Ray (she/her)

Subject: Comprehensive Plan Comments

I think I might be too late to comment on the Community Values and Vision chapter of the Comprehensive Plan. But if not, below are my comments. My concern is the excessive noise made by vehicles with modified exhaust systems. It seems to be getting worse every day.

Whether visiting with friends on the front porch, picnicking in the back yard or at a local park, or attending an outdoor summer concert at the State Capitol we should all have the right to enjoy our time outdoors without disruptions caused by excessive noise.

In addition, cycling along our roadways can be dangerous due to loud noise. Sudden, loud noises can startle cyclists potentially causing them to lose control and make abrupt maneuvers that could lead to accidents and injuries.

Thank you for considering my comments.
