2015-2020 Water System Plan and Reclaimed Water Revenues

Utility Advisory Committee May 1, 2014

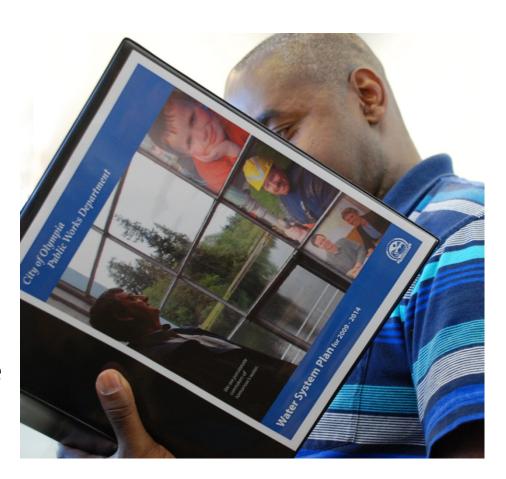

Laura Keehan – Water System Plan Donna Buxton – Reclaimed Water

2015-2020 Water System Plan

The Plan addresses:

- New sources of water supply
- Groundwater protection
- Water conservation
- Use of reclaimed water
- Capital projects to improve system infrastructure
- Operations and maintenance
- Water quality and treatment
- Financial strategies

2015-2020 Water System Plan

Water System Plan Update 2015-2020 Schedule

	JAN 13	FEB 13	MAR 13	APR 13	MAY 13	JUN 13	JUL 13	AUG 13	SEP 13	13	NOV 13	DEC 13	JAN 14	FEB 14	MAR 14	APR 14	MAY 14	JUN 14	JUL 14	AUG 14	SEP 14	OCT 14	NOV 14	DEC 14	JAN 15	FEB 15	MAR 15	APR 15	MAY 15	JUN 15	JUL 15	AUG 15	SEP 15	OCT 15

Presentation Overview - Reclaimed Water

Remaining Presentation will cover ...

- Overview of RW generation and use
- History of RW revenues
- 2010-2012 UAC input on revenue and incentives
- 2014 New rates, fees, and charges
- Considerations for revisiting RW revenues as part of 2015 Water System Plan update

Reclaimed Water - Generation

Generation – LOTT Clean Water Alliance

- Beneficial uses; not as drinking water
- Environmental drivers regional water resources
- Budd Inlet Treatment Plant
 Expensive to generate and distribute; no cost estimate
 LOTT revenues include rates/charges, loans, and bonds
- Specified volumes distributed to LOTT partners
- Olympia pays \$1 per year for 460,000 gallons/day
 Use less than 5% (9-year average is ~ 24,500 gpd)

City of Olympia – RW Purveyor

2005–2013 customer use and revenue

- ~ 60 million gallons used (9 years)
- ~ \$245,000 revenue collected (6 years)
- ~ \$41,000 per year average revenue
- ~ \$60,000 per year is cost of RW program staffing and operating budget (66% recouped)

Subsidized by LOTT wastewater revenues Incentivized by City drinking water charges

Reclaimed Water - Revenue History

Olympia's RW Revenue History

	2005-08	2009-13	2014
Ready-to-Serve (meter)	-	_	100%
Irrigation (seasonal)	_	70%	70%
Indoor use (tiers)	-	-	70%
General Facility Charge	_	_	_
Engineering Fees	-	_	100%
Building Code Fees	-	-	100%
Land Use Fees	_	_	100%
Violations/Fines	-	-	100%

Reclaimed Water - Prior UAC Input

2009 - Utility explores amending OMC 13.24

2010-2011 – UAC questioned subsidizing RW

2012 – UAC's position on funding RW

- Charge 100% of water rates (not 70%)
- Collect a General Facility Charge
- Support a low-interest loan program
- LOTT should help bear the cost of advancing RW
- Create wastewater volume-based rates

Reclaimed Water - Initial Rate

Early Use and Revenue

- Users Port of Olympia, Department of Enterprise Services, City Parks Department
- Uses outdoor irrigation (industrial uses by LOTT)
- Use Areas Port of Olympia Marina, Heritage Park,
 Marathon Park, Percival Landing
- Revenue 70% of water utility irrigation rate

Reclaimed Water Advancements

Advancements since 2011

- Existing Users are using more Port, LOTT, City
- New Uses outdoor water feature, dust control; indoor toilets, cooling
- New Use Areas Weyerhaeuser, East Bay Public Plaza, Hands On Children's Museum
- Potential new User proposed building downtown

Reclaimed Water OMC Amendments

2014 Amendments to OMC 13.24 RW

- Closed regulatory gaps
- Relaxed use requirements (within state standards)
- No loans; no rebate program; no help with high cost
- Added new rates, fees, and charges (consistent with other City utilities)

Reclaimed Water - 2014 Fees

2014 OMC - New Fees

The following RW fees are 100% of other utilities' fees:

- Engineering Fees OMC 4.04
- Building Code Review & Permit Fees OMC 4.36
- Land Use Application Review Fees OMC 4.40
- Fees and Fines OMC 4.24

Olympia

2014 - New Rates and Charges

- Ready-to-Serve (meter) charge monthly; 100%
- Consumption charges volumetric; 70%
 New charge 70% of tiered structure for indoor use
 Retained charge 70% of outdoor/irrigation rates
- General Facility Charges not collected for RW

Reclaimed Water - Revisit Revenues

2015 Water System Plan update provides opportunity to revisit RW revenues and financial structure.

Reclaimed Water - Paying for it...

Rate Structure Design Options

- Fully funded by City, developer, or other User
- City shares cost after securing grants, loans, bonds
- Those who benefit, pay drinking water customers;
 wastewater customers; new customers; developers
- Determined by market analysis; cost-of-service estimate; percentage of potable rates
- Reflect utility policies, goals and objectives

Reclaimed Water - Staff Input

Staff Suggestions/Questions

- Calculate annual revenue at 100% of water consumption charges and GFC
- Compare our rate structure with peer cities
 - Adjust our monthly meter or volume charges?
- Other (all; some; combination?)
 - Metered (\$/gallon) and Unmetered (\$/acre)?
 - Fixed rate depending on Use or User?
 - Inverted Rate Structure "Use more, pay less"?

Reclaimed Water - UAC Input

Should RW rate structure be revisited?

- Stay at 70% incentive with no GFC?
 See effects of new rates, fees, charges?
- Contract financial consultant to identify options?

UAC Recommendations/Questions?

- Staff will share with financial consultant for analysis
- Anticipate receiving analysis results late in 2014

2015 Water System Plan & Reclaimed Water Revenues

Questions and Discussion
