

Engineering Design and Development Standards

Chapter Summaries and 2012 Proposed Changes

Throughout *ALL* Chapters: Text edits for clarity, add/update links

Chapter 1: General Considerations

- *Chapter Focus:* Identifies and outlines the authorities under which the EDDS are administered.
- *Proposed Changes:* Update Plan titles, add reference to Revised Code of Washington (RCW), and delete Section 1.060 Policies.

Chapter 2: Administration

- *Chapter Focus:* Outlines the applicability of the EDDS, including definitions used in the text.
- *Proposed Changes:* Remove Variance text (covered in OMC Chapter 17.52), updated definitions, deleted second paragraph of Section 2.010, Applicability.

Chapter 3: General Standards

- *Chapter Focus:* Outlines the applicable design standards for all work to be done within City right of way.

Chapter 4: Transportation

- *Chapter Focus:* Street classifications and applicable standards for street frontage improvements.
- *Proposed Changes:* New criteria to address in-fill sidewalk options for single family residents on local access streets, add LED illumination criteria, add Bicycle Facilities Map, clarify trail and shared use path standards, new street repair standard for Septic to Sewer conversion projects, updates to Table 2 clarifying street tree requirements, update awning reference to OMC 12-24.020, deleted proposed language in section 4B.030, new street tree grate standard drawing, update access ramp standard drawings, remove bus pullout and shelter standard drawings, remove rock retaining wall standard drawing, update parking meter post standard drawing.

Chapter 5: Storm Water

- *Chapter Focus:* Minimum standards for the design and construction of storm drainage facilities, addressing collection, conveyance and treatment.
- *Proposed Changes:* New pipe installation tolerances, new decorative cover standard drawing.

Chapter 6: Drinking Water

- *Chapter Focus:* Design standards and drawings applicable for construction of potable water infrastructure.
- *Proposed Changes:* Standard drawing updates to reflect updated manufacturer information and clarify installation notes.

Chapter 7: Waste Water

- *Chapter Focus:* Design standards and drawings applicable for construction of piping and associated improvements to collect, pre-treat and route domestic, commercial and industrial waste.
- *Proposed Changes:* New pipe installation tolerances, revise language to be consistent with city and industry standards. Standard drawing updates to reflect updated manufacturer information. Delete inside drop connection standard drawing.

Chapter 8: Waste Resources

- *Chapter Focus:* Design standards and drawings for construction of refuse/recycling site improvements.
- *Proposed Changes:* New text and standard drawings to clarify design and construction requirements that will result in enclosures that meet both the customer and service providers needs.

Chapter 9: Green Cove Basin

- *Chapter Focus:* Design standards applicable to the Green Cove Basin, located in Northwest Olympia. These standards place additional emphasis on stormwater minimization and infiltration.
- *Proposed Changes:* New General Vegetation Coverage standard drawing.

Chapter 10: Reclaimed Water

- *Chapter Focus:* Prescribed standards for utility water mains and related facilities for the purpose of conveying, under pressure, Class A reclaimed water for permitted reuse.
- *Proposed Changes:* Removed standard drawings also found in Chapter 6, Drinking Water. New valve extension standard drawing.
