Elevated Streets	Raised Landscapes	Flood Walls

Sea Level Rise Response Planning

Strategies for Olympia

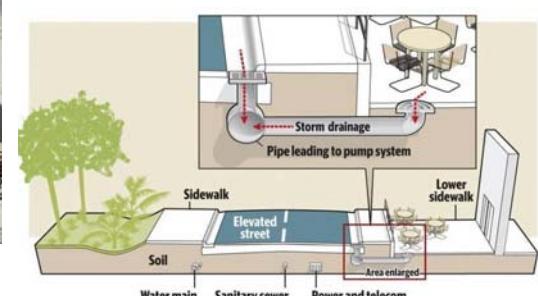

Elevated Buildings	Living Shorelines	Temporary

Miami Beach, FL

Elevated Streets

- Roadways can be elevated to create flood barriers
- Could benefit from uninterrupted right-of-way

Sea Level Rise Response Planning

Preliminary Concepts

Sea Level Rise Response Planning

Anticipated Plan Recommendations

- Structural
 - What to build
 - When to build it
 - What it could cost
- Governance
 - Roles, authority, responsibilities, coordination
 - State and Federal relationships
- Informational
 - Additional work efforts

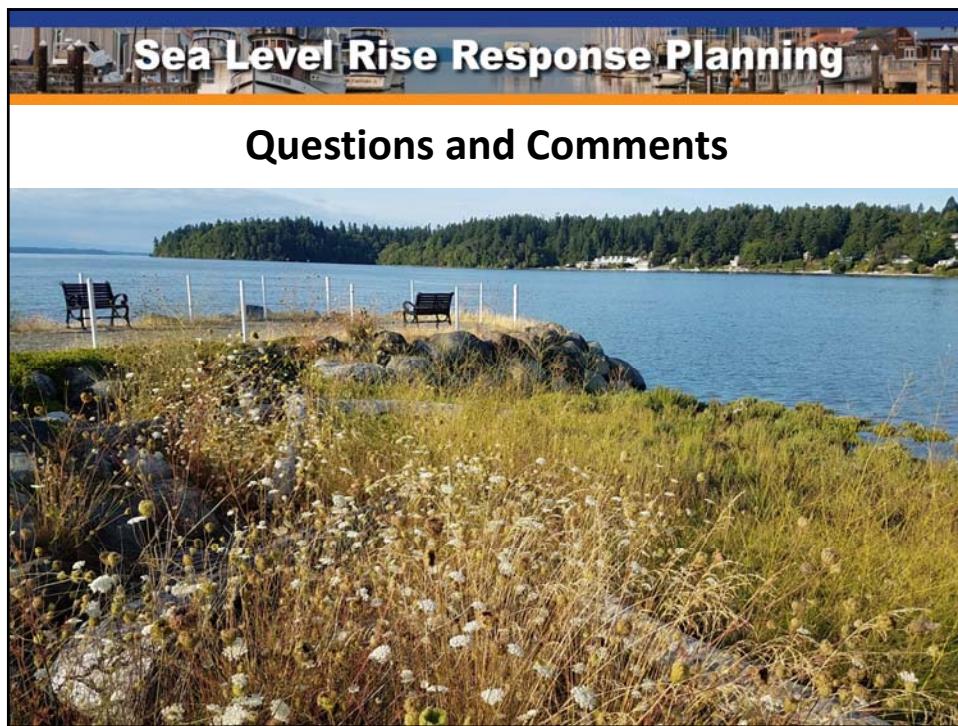

Sea Level Rise Response Planning

Questions and Comments

A scenic view of a waterfront area. In the foreground, there is a grassy slope with some low-lying white flowers and small rocks. Beyond the slope is a rocky shoreline. In the background, there is a large body of water, possibly a bay or a lake, with a small, densely forested island visible across the water. The sky is clear and blue.
