

South Olympia and Chambers City Staff Recommendation

Olympia Planning Commission (OPC)

Deliberation Date: October 22, 2012

OPC and Thurston County Planning

Commission Joint Public Hearing Date: October 10, 2012

OPC Briefing Date: September 17, 2012

Prepared by: Amy Buckler, Associate Planner

Proponents: Thurston County

Proposal Description: Reconsideration of Urban Growth Area Boundary and Zoning for the South Olympia/Chambers Study Area.

State Environmental Policy Act (SEPA) Determination:

Thurston County, the lead SEPA agency for this proposal, issued a Determination of Non-Significance (DNS) on October 9, 2012 (Attach. 7)

City Staff Recommendation¹:

- Re-designate the area north of Chambers Ditch from Residential 4-8 Units per Acre (R 4-8) to Residential 4 - Chambers Basin (R-4CB.)
- Re-designate the area south of Chambers Ditch from Residential 4-8 Units per Acre (R 4-8) to Residential 4 units per acre.
- Keep the entire area within the Urban Growth Area (UGA)

County Staff Recommendation:

Not Available. County staff will issue their recommendation to the Thurston County Commissioners in early November.

¹ See end of document for Joint Plan Land Use Designation definitions and the City's Residential Development standards table. The City's standards are included for reference. Development is subject to the applicable jurisdictions standards. The City and County adopt consistent (but not identical) standards for areas in the unincorporated UGA.

Background and Analysis: Thurston County is the primary agency responsible for analysis of this proposal (See Attachment 5.) As part of the joint planning process, City staff provides a recommendation to the Olympia Planning Commission and City Council regarding the proposed joint plan amendment and pre-zoning in the UGA. The following is supplemental to the County's staff report.

Consistency with the Comprehensive Plan: The Plan indicates the city's population growth needs to be accommodated in a sustainable manner while maintaining environmental quality. Growth and development should be directed to areas with the capacity to absorb development where facilities can cost effectively be provided. Environmental constraints should be taken into consideration when making land use decisions. Excerpts from the Joint Comprehensive Plan for Olympia and Thurston County are on page 38 of the County staff report.

Rational for Staff Recommendation: The R4-CB zoning is applied to an area northeast of the subject site which is also part of the Chambers Lake drainage basin (See Olympia Zoning Map, Attachment 2.) As similar circumstances exist within the subject area, City staff found R4-CB may also be appropriate for the area of the subject site north of Chambers Ditch.

The R4-CB zoning designation was developed following a technical and policy evaluation of the interrelated groundwater and stormwater problems within a portion of Chambers Basin and the related implications for future land use development. The evaluation was conducted during a moratorium on development that began in April 2006 due to concerns about impacts of further residential development in the area. The study was contained to the 530 acre area depicted on the Chambers Basin Moratorium Map (Attachment 4.) The evaluation did not specifically include the subject area.

A copy of the Chambers Basin Moratorium Report is Attachment 3. Although not inclusive of the subject site, it is referred because it is the most current study available to the City addressing issues within Chambers Basin. The area studied has many of the same issues as the subject area (i.e., high ground water, relatively flat topography, poor drainage.)

The R4-CB zoning is a modified version of the existing Residential 4 units per acre zoning (R4); it is designed for high groundwater areas and applies stormwater design standards for meeting full stormwater dispersion. Managing stormwater by full dispersion techniques involves spreading runoff over a wide area and allowing it to gradually infiltrate into surface soils. This method takes advantage of the soil moisture capacity of any soil remaining above the groundwater level. Full dispersion attempts to maximize groundwater recharge, while decreasing or eliminating runoff, and greatly reducing the concentration of runoff at any one location.

In 2008, the City applied the R4-CB zoning district to the area north of the Chambers Ditch within the previous moratorium. The City applied Residential 4 to 8 units per acre (R 4-8) to the area south of the Ditch, where topographic and soil conditions allow for better infiltration. At

the time, the City recognized it lacked information to draw a more specific line of divide between the two zones, but given what was known reasoned it was the best choice available.

Lacking further information, the recommendation is to apply zoning within the subject site that is consistent with the City's adjacent zoning. That is to apply R4-CB to the areas north of the Ditch, and R4 south of the ditch. Both are lower density than what currently exists, and are intended to accommodate residential development in areas sensitive to stormwater runoff in a manner and density that avoids stormwater related problems.

Other land use designations/zoning considered:

Residential Low Impact 2-4 units per acre (RLI). This is a zoning designation that was created to be applied to the Green Cove Basin to address water quality and other issues. The RLI was not designed for flat, ditched areas; whereas the R4-CB is geared toward conditions more specific to Chambers Basin.

Planning Commission Options: The Commission may decide to recommend:

1. The City staff recommendation outlined on page 1; or
2. Any of the options listed in the County preliminary staff report; or
3. No change; or
4. Another recommendation as developed by the Commission.

POLICIES:

- LU 18.18 Expansion of existing industrial uses should only be permitted within properties currently used for industrial purposes.
- LU 18.19 New industrial uses should be limited to water-dependent or water-related industrial uses (as defined by the Shoreline Master Program). (Ordinance #6140, 08/28/01)
- LU 18.20 New structures along the shoreline should be located and designed to minimize the blockage of views from upland residences and offices.
- LU 18.21 In the event that the rail line adjacent to West Bay Drive is abandoned, consideration should be given to using the southern portion of the rail line right-of-way (near the wildlife tidal lagoon) for an urban trail connecting to the Percival Landing and Deschutes Parkway waterfront facilities. (See the Urban Trails Plan.) (Ordinance No. 5569, 12/19/95; Ordinance #6140, 08/28/01)

LAND USE DESIGNATIONS

This section provides a brief description of the land use designations shown on Map 1-3. Figure 1-5 summarizes the types of uses, densities of development, and building heights generally allowed in under these designations. Figure 1-6 lists the acreage of land area proposed for each land use in each neighborhood. The zoning ordinance will provide more detailed direction regarding the development of these areas, consistent with the policies of this chapter.

Residential- 1 Unit Per 5 Acres. This designation provides for low-density residential development in designated sensitive drainage basins in a manner that protects aquatic habitat from degradation.

Residential Low Impact. This designation provides for mixed density single-family residential development at average housing densities from two to four units per acre, provided that the development avoids adverse impacts upon aquatic habitat and does not create off-site stormwater problems. (Ordinance #6140, 08/28/01)

Residential - 4. This designation provides for single family residential development at densities that will maintain environmental quality and prevent stormwater related problems. Residential development may occur in these areas at densities of up to four units per acre, provided that the applicant demonstrates that stormwater generated by the proposed development can be accommodated without creating off-site problems. (See the Drainage Design and Erosion Control Manual.)

Residential 4-8. This designation provides for single family and townhouse development at densities between four and eight units per acre. Housing on sites without sewer service must be clustered on a portion of the site, consistent with Environmental Health requirements, so that the overall site can achieve a minimum density of four units per acre upon provision of sewer service. (See LU5.)

Residential 6-12. This designation provides for single family, duplex, and townhouse development at densities from six to twelve units per acre. Areas designated for such use should be relatively close to arterials or major collectors with transit service. Parcels located in the High Density Corridor Transition Area are allowed triplex and fourplex housing types as permitted uses.

Residential Mixed Use. This designation provides for downtown high density housing mixed with commercial uses. The commercial uses are intended to help preserve the residential use of the area by providing retail and personal services within walking distance of the housing.

Residential Multifamily 18. This designation provides for multifamily development at densities averaging eighteen (18) units per acre.

The permitted maximum density will be on or near arterial or collector streets at a density and configuration that facilitates effective and efficient mass transit service, enables affordable housing and is designed to be compatible with adjoining uses including existing and proposed single-family. (Ord. #5757, 12/16/97)

Residential Multifamily 24. This designation provides for multifamily development at densities averaging twenty-four (24) units per acre. The permitted maximum density will be on or near arterial or major collector streets at a density and configuration that facilitates effective and efficient mass transit service, that enables affordable housing and is close to major employment and/or major shopping areas (e.g. the Capital Mall and the Lilly Road medical complex). (Ord. #5757, 12/16/97)

High Density MultiFamily. This designation provides for downtown mid-rise multifamily housing near the center of the City, the Capitol Campus, shopping, and transit. It is intended to encourage dense downtown neighborhoods with a wide range of housing types, prices, and rent levels.

Urban Residential. This designation accommodates multifamily housing in multistory structures in or near the State Capitol Campus, downtown, High Density Corridor or other activity center areas; to provide opportunities for people to live close to work, shopping, and services; to help achieve City density goals, to create or maintain a desirable urban living environment for residents of the district; and to ensure that new urban residential buildings incorporate features which encourage walking and add interest to the urban environment. (Ordinance #6323, 10/15/2004)

Mixed Density 7-13. This designation provides for a mixture of single and multifamily development at densities averaging seven to thirteen units per acre. The zoning ordinance may establish requirements for the minimum proportions of various types and densities of residential uses in projects developed under this designation. Neighborhood centers may be established in these districts subject to the policies of this chapter.

Mixed Density - 10-18. This designation provides for multifamily housing averaging ten to eighteen units per acre. Neighborhood centers may be established in these areas, consistent with applicable policies in this chapter.

Neighborhood Centers. This designation provides for the development of neighborhood centers, which will typically include neighborhood oriented convenience businesses and a small park (see Figure 1-1). The locations for neighborhood centers shown on Map 1-3, Future Land Use are approximate, but are intended to apply within the bounds of the districts in which they appear on the map. The exact location and mix of uses of the centers in these areas will be established at the time of project approval, consistent with applicable policies and requirements. Additional neighborhood centers may be established consistent with the policies of this chapter and other applicable regulations. (See LU9.)

Neighborhood Commercial. This designation provides for specific neighborhood convenience commercial uses in residential areas, [to be defined in the zoning ordinance]. [Language in brackets not adopted by Thurston County Board of County Commissioners.]

Community Oriented Shopping Center. This designation provides for the development of community- oriented shopping centers. Such centers will typically contain a supermarket and drug store, and a variety of personal and professional services scaled and oriented to serve the surrounding neighborhood (e.g., 1-1/2 mile radius). On larger sites, residential uses may be incorporated into the site design. The zoning ordinance will provide standards for the development of such districts to ensure that they are compatible with adjoining uses.

Neighborhood Village. This designation provides for a compatible mix of single and multifamily housing (averaging seven to thirteen units per acre) and a neighborhood center. This designation will enable development of innovative residential communities offering a wide variety of compatible housing types and densities,

neighborhood convenience businesses, recreational uses, open space, trails and other amenities that are seldom achieved under conventional, segregated zoning districts. Specific requirements for the siting and relationship of the various land uses, dwelling types, and densities in these developments will be established in the zoning ordinance, consistent with the applicable policies of this chapter. The actual mix and arrangement of uses will be established by the project's binding site plan. (See page LU10.)

Land under this designation may be redesignated for another use upon demonstration that the site is not viable for development of a neighborhood village due to site conditions, infrastructure or street capacity or, in the case of multiple ownerships, land assembly problems.

Urban Villages. This designation provides for the development of urban villages. Urban villages are essentially the same as neighborhood villages, except the commercial component is bigger and caters to a larger area. (See LU10.)

Land under this designation may be redesignated for another use upon demonstration the site is not viable for development of an urban village due to site conditions or inadequate infrastructure or street capacity.

Medical Services. This designation provides for medical services and facilities, associated uses, and moderate to high density housing.

Professional Office/MultiFamily. This designation accommodates a wide range of offices, services, limited retail uses specifically authorized by the applicable zoning district and moderate-to-high density multifamily housing in structures as large as four stories. (Ord. #5757, 12/16/97)

General Commercial (GC). This designation provides for commercial uses and activities which are heavily dependent on convenient vehicle access but which minimize adverse impact on the community, especially on adjacent properties having more restrictive development characteristics. The area should have safe efficient access to major transportation routes, but discourage extension of "strip" development by filling in available space in a way that

accommodates and encourages pedestrian activity. (Ord/ #5757, 12/16/97)

High Density Corridor-1 (HDC-1). This designation provides for a mix of office, moderate to high-density multifamily residential, and small-scale commercial uses. The area should be a safe, convenient and attractive pedestrian environment that includes access by a full range of travel modes in order to reduce the number and frequency of vehicle trips. Opportunities to live, work, shop and recreate are encouraged within walking distance of these areas. (Ord. 6073, 12/12/00)

High Density Corridor-2 (HDC-2). This designation provides for a mix of office, medium intensity commercial and moderate to high-density multifamily residential uses. Opportunities to live, work, shop and recreate are encouraged within walking distance of these areas. The area should be a safe, convenient and attractive pedestrian environment that includes access by a full range of travel modes in order to reduce the number and frequency of vehicle trips. (Ord. 6073, 12/12/00)

High Density Corridor-3 (HDC-3). This designation provides for a mix of medium to high-intensity commercial, offices, and moderate to high-density multifamily residential uses. Neighborhood and community shoppers will be encouraged to frequent these areas. As redevelopment occurs the access and needs of pedestrians, bicyclists, transit riders and motorists should be addressed. (Ord. 6073, 12/12/00)

High Density Corridor-4 (HDC-4). This designation provides for a mix of high-intensity commercial, offices, and high-density multifamily residential uses. Over time this area will transform into a more dense form of community activity centers and as continuous a street edge as possible which balances the access needs of pedestrians, bicyclists, transit riders and motorists. (Ord. 6073, 12/12/00)

Urban Waterfront. This designation provides for a compatible mix of commercial, light industrial, limited heavy industrial, and multifamily residential uses along the

waterfront, consistent with the Shoreline Master Program for Thurston Region. (Ord. #5757, 12/16/97)

Urban Waterfront – Housing (UW-H). This designation provides for a neighborhood of residential housing with limited retail/commercial/office. This area is intended to help meet city housing density goals for downtown, and sustainability goals through the use of land for housing in a location – and at a density – that makes the use of a car a choice and not a necessity. Housing in these high amenity areas will: contribute to downtown vitality; result in well-designed buildings on continuous street edges; link one area with another; encourage pedestrian activity; add resident surveillance of public spaces to increase safety and decrease vandalism or other security problems; and help the city achieve land use, transportation, environmental and housing goals. Development with 200 feet of the shoreline are subject to The Shoreline Master Program for the Thurston Region as amended. (Ord. #6195, 07/03/02)

Light Industrial. The designation provides for light industrial uses (e.g., assembly of products, warehousing) and compatible, complementary commercial uses.

Industrial. The designation provides for heavy industrial development, such as manufacturing, transportation terminals and bulk storage, and complementary commercial uses. Much of the land under this designation is subject to the provisions of the Shoreline Master Program for Thurston Region.

Downtown Business (DB). This designation provides for a wide range of activities that make downtown Olympia the cultural, civic, commercial and employment heart of the community. A dense mix of housing, pedestrian oriented land uses and design and proximity to transit make a convenient link between downtown, the State Capitol, the waterfront, and other activity centers in the region. The scale, height and bulk of development reinforces downtown Olympia's historic character, buildings, places and street layout. (Ord. #5757, 12/16/97)

Capitol Campus and Commercial Services - High Density. This designation contains the State of Washington Capitol Campus and areas where limited commercial services and high density multifamily can enhance activities near chief employment centers such as the Capitol Campus, Downtown Business District and Central Waterfront. The zoning ordinance will establish building height limits which protect views of the Capitol Dome. (Ord. #5757, 12/16/97)

Manufactured Housing Park. This designation is intended to provide suitable locations for retaining existing manufactured housing parks or allowing for the development of new ones. This designation should also allow other residential forms that are comparable to manufactured housing parks in development intensity, such as single-family homes, duplexes, townhouses, and the like. (Ord. #5661, 12/26/96.)

Planned Unit Development (Ord. #5757, 12/16/97)

Evergreen Park Development. This designation provides for development and use of properties in Evergreen Park Planned Unit Development in accordance with the original project approval granted by Ordinance No. 3544 and all subsequent amendments thereto, including, but not limited to, Ordinance Nos. 3579, 3730, 3776, 4835, and 5215.
