RE: West Bay Lift Station Upgrade, Project #0931Q Bid Proposal
Notification of Determination of Non-Responsibility

Dear Mr. Rasmussen:

This letter concerns the bid submitted by Razz Construction Inc. to the City of Olympia, Washington, for the above referenced project. Upon review of your proposal, City staff has determined that the information you submitted does not meet the supplemental bidder responsibility criteria specified for this project. Specifically;

Section 1-02.14 (A) states "The Bidder shall have successfully completed three projects of similar size and scope..." Your submittal included information for five projects; however, none of the projects met all requirements of this section.

One project failed to meet the requirements of Section 1-02.14 (9) A. - Criterion: listed in the Supplemental Bidder Responsibility Criteria.

- Project #4 did not meet the requirement that the projects were successfully completed. That project is still in progress.

Three projects failed to meet the requirements of Section 1-02.14 (9) A. a. – Similar Size and Scope: listed in the Supplemental Bidder Responsibility Criteria.

- Project #1, project #3 and project #5 did not meet the requirement for a total value of mechanical and electrical work of no less than \$300,000.

- Project #2, project #3 and project #5 did not meet the requirement that the project include standby diesel engine generators for the pumps.

Two projects failed to meet the requirements of Section 1-02.14 (9) B. Documentation: listed in the Supplemental Bidder Responsibility Criteria.

- Project #2 did not meet the requirement for completion of the project in the five (5) years prior to the bid submittal date.
- Project #5 did not meet the requirement that the project include pumps of at least 15 horsepower in size.

The City Council is scheduled to award the contract for this project at its meeting on April 16, 2013, at City Hall Council Chambers (First Floor), 601 4th Avenue East, Olympia, WA. In its report to Council, City staff will recommend formal rejection of your bid for failing to meet the responsibility criteria. **If you wish to submit additional, relevant information for consideration, please refer to the procedure found in Section 1-02.14 of the Project Special Provisions. Any appeal of this determination must be received by the City no later than 4:00 p.m. on March 25, 2013.** Appeals must be clearly marked "APPEAL" and must be delivered to: City of Olympia, Attn: Jim Rioux, at City Hall, 601 4th Avenue East, Olympia, Washington.

Sincerely,

Jim Rioux
Project Manager
Public Works Technical Services

REF: WEST BAY LIFT STATION UPGRADE, PROJECT # 0931 BID PROPOSAL

SUB: APPEAL OF DETERMINATION OF NON-RESPONSIBILITY

Dear Jim,

RAZZ Construction, Inc. (RAZZ) is in receipt of the City of Olympia's letter dated March 21, 2013, stating RAZZ is non-responsible for the referenced project pursuant to Section 1-02.14(A) of the contract documents.

RAZZ does not agree that we are non-responsible, and have added three (3) additional projects to show that RAZZ has significant experience in municipal construction involving heavy mechanical, electrical, and concrete. RAZZ self-performs the mechanical, electrical and concrete which is an advantage to an owner because it limits the use of subcontractors, and allows the contractor to control the construction schedule.

The three (3) additional municipal projects are attached and involved setting of pumps in excess of 15 . horse power, larger bore piping and generators. The three projects are labeled 6 through 8 accordingly and each projects mechanical and electrical package exceeds \$ 300,000. While these pump stations did not pump sludge, the construction activities required all the same construction principals regardless of color and smell of media pumped. These stations lift water and pass them to the next series of pumping stations.

The complexity of the Ferndale Well Water Supply Pump Station and Bryan Well Field Treatment Facility far exceed that of this simple sewage pump station being constructed at West Bay.

We have attached the resume for myself and mechanical foreman, Tom Putt, which show that we both have constructed two (2) lift stations; Lynden Waste Water Treatment Plant and Oak Street Pump Station while I was a principal owner at another contractor, Strider Construction. Both these Lift Stations exceeded \$ 5 million dollars.

While the bidding documents infer that a contractor develops dementia after five (5) years, that is really not the case. A contractor's life long experience in heavy civil contracting benefits both the contractor and owner.

March 25, 2013
City of Olympia
Page 2

Based on the City of Olympia's verbal communication, they intend to award the project to the third bidder, McClure and Sons, who was \$ 6,040.46 higher than RAZZ's price. By awarding to McClure and Sons, they will deny several local subcontractors and employees the opportunity to contribute towards supporting the City of Olympia tax bases.

RAZZ intends on using the following local subcontractors on this project who **will not** be awarded the work if the City of Olympia continues award to McClure and Sons:

- Summit Fence Company	Olympia, WA. Chainlink Fence	\$ 14,952.00
- Capital Heating and Cooling	Lacey, WA HVAC	\$ 24,855.00
- Betschart Electric	Olympia, WA Electrical	\$ 217,000.00
- Tom Putt	Lacey, WA. RAZZ Foreman	<u>\$ 35,000.00</u>
Direct Revenue Loss to Local Businesses		\$ 291,807.00

The second paragraph of the Supplemental Bidder Responsibility Criteria form clearly states, "**The City of Olympia will be the sole judge in determining if the prospective contractor meets the minimum experience requirements.**" Therefore, RAZZ requests that the City of Olympia re-evaluate RAZZ's cumulative experience with bypass pumping, heavy mechanical piping, electrical, generators, and concrete, and award this project to the low responsive bidder, RAZZ Construction, and use the surplus funds for some other struggling budget.

Sincerely,

Donald A. Rasmussen
President

SUPPLEMENTAL BIDDER RESPONSIBILITY CRITERIA

WEST BAY LIFT STATION UPGRADE

March 25, 2013

6. FERNDALE WELL WATER SUPPLY PUMP STATION

Two sites will be developed as the new permanent groundwater sources and construction will consist of well pumps and motors within existing wells. A pump station building at each site, site improvements, site utilities, miscellaneous mechanical components, emergency chlorination systems, and electrical, control and telemetry improvements. The third site is the City's existing surface water treatment plant which will be converted into a groundwater treatment plant. Construction will consist of filter media replacement, a filter retrofit with air scour systems replacement of a vertical turbine backwash supply pump, a sodium hypochlorite on-site generation system, a caustic soda PH adjustment system, structural modifications to the building , site improvements, site utilities, miscellaneous mechanical components, a process waste detention tank, sewer main installation and electrical, control and telemetry improvements and other miscellaneous work.

7. BOOSTER PRV STATIONS & SNOQUALMIE POINT PRV STATION

The 384th Ave. SE Booster and PRV Station and Snoqualmie Point PRV Station project includes, but is not limited to, installation of new pumps, piping, valves and fittings within the 384th Ave SE Booster Station to replace existing pumps, installation of an exterior pressure control valve vault on the 384th Ave. SE Booster Station Site, installation of new piping and valving at the Snoqualmie Point PRV Station, and installation of updated electrical and both sides.

8. BRYANT WELL FIELD TREATMENT FACILITY

The work consisted of installing a 75,000 gallon above-grade concrete reservoir, 1,840 square foot treatment building including six rooms: filter piping/mechanical; laboratory; storage; electrical; chemical; and engine generator. Site work consisted of working with raw and treated water utilities, power, signal and storm utilities, 840-foot long 42-inch diameter pipeline for chemical contact time.

Progress Estimate #6

Douglas and Shop Well PS and Groundwater Treatment Plant
April 30, 2012 thru Sept 30, 2012

Douglas and Shop Well PS and Groundwater Treatment Plant

West Bay Lift Station Upgrade
Project No. 0931Q**9. Completion of Similar Projects**

- The Bidder shall have successfully completed three (3) projects of a similar size and scope as required by the contract documents for this project.

Similar Size & Scope: means the project meets all of the following criteria, at a minimum:

- Lift station upgrade construction contracts for a municipality with a total value of mechanical and electrical work of no less than \$300,000.

"Municipality" means the state or a municipality authorized by Washington law to contract for the execution of a public work, all as defined in RCW 39.04.010.

- Lift station upgrades involving replacement of electrical and mechanical equipment inside an existing structure, with pumps no less than 15 horsepower in size, and with standby diesel engine generators.

RE: West Bay Lift Station Upgrade, Project #0931Q Bid Proposal
Notification of Determination of Non-Responsibility

Dear Mr. Vasey:

This letter concerns the bid submitted by Award Construction Inc. to the City of Olympia, Washington, for the above referenced project. Upon review of your proposal, City staff has determined that the information you submitted does not meet the supplemental bidder responsibility criteria specified for this project. Specifically;

Section 1-02.14 (A) states “The Bidder shall have successfully completed three projects of similar size and scope...” Your submittal included information for five projects; however, only two of the projects met all requirements of this section.

Two projects failed to meet the requirements of Section 1-02.14 (9) A. - Criterion; listed in the Supplemental Bidder Responsibility Criteria.

- Project #4 and project #5 did not meet the requirement that the projects were successfully completed. Both projects are still in progress.

One project failed to meet the requirements of Section 1-02.14 (9) A. Similar Size & Scope: listed in the Supplemental Bidder Responsibility Criteria.

- Project #3 listed in the Supplemental Bidder Responsibility Criteria did not meet the requirement for a total value of mechanical and electrical work of no less than \$300,000.

Three projects failed to meet the requirement of Section 1-02.14 (9) B. Documentation: listed in the Supplemental Bidder Responsibility Criteria.

- Project #3 did not meet the requirement for completion of the project in the five (5) years prior to the bid submittal date.
- Project #4 and project #5 did not meet the requirement that the projects include a standby generator.

The City Council is scheduled to award the contract for this project at its meeting on April 16, 2013, at City Hall Council Chambers (First Floor), 601 4th Avenue East, Olympia, WA. In its report to Council, City staff will recommend formal rejection of your bid for failing to meet the responsibility criteria. If you wish to submit additional, relevant information for consideration, please refer to the procedure found in Section 1-02.14 of the Project Special Provisions. Any appeal of this determination must be received by the City no later than 4:00 p.m. on March 25, 2013. Appeals must be clearly marked "APPEAL" and must be delivered to: City of Olympia, Attn: Jim Rioux, at City Hall, 601 4th Avenue East, Olympia, Washington.

Sincerely,

Jim Rioux
Project Manager
Public Works Technical Services

RE: West Bay Lift Station Upgrade, Project #0931Q
Appeal of Bidder Responsibility Determination

Delivered via Fedex

Mr. Rioux,

The intent of this letter is to appeal the determination that Award Construction, Inc. (ACI) has not met the bidder responsibility criteria set forth in the contract documents for the West Bay Lift Station Upgrade project.

As ACI understands it, the intent of the bidder responsibility criteria is to ensure that the project is awarded to a contractor who had demonstrated experience working for municipalities on projects of a similar size with pumps over 15 HP, diesel standby generators, and mechanical and electrical work over \$300,000 inside of an existing structure. ACI contends that with our experience we meet these responsibilities and are experienced in the extensive coordination that is required when performing mechanical and electrical work within an operating lift station. Since this particular project entails bypass pumping, the use of stand-by diesel generators, and installation of mechanical and electrical in a enclosed space it is important that the selected contractor has a proven record of safely and effectively managing these operations.

While the criteria contained within the bid stated experience with 3 projects, each of only \$300,000, ACI contends that it meets the intent and aggregate totals of the bidder responsibility with the two following projects. Please consider the following information in your determination of whether ACI meets these criteria:

- Project #1 - City of Puyallup 19th & Pioneer Lift Station Improvements
 - The mechanical and electrical work on this project amounted to approximately \$1.3 million
 - Four pumps were installed – 2 new and 2 replacing existing pumps. Each was required to handle 4,500 gpm at 75 ft TDH, and had a motor rated at 142 hp.
- Project #2 – City of Everett West Casino Elevated Tank
 - This project's mechanical and electrical work totaled approximately \$2.7 million
 - Four 200 hp pumps were installed, each handling 6,000 gpm at 104 ft TDH

The successful completion of these projects demonstrates that ACI's experience surpasses that required by the West Bay Lift Station responsible bidder criteria. An aggregate of the three

similar projects required would amount to only \$900,000 of electrical and mechanical work and the installation of a total of three pumps over 15 hp.

The two projects listed above total \$4,000,000 of electrical and mechanical work and the installation of 8 pumps, all over 140 hp. These pumps were installed with minimal disruptions to existing operations at their respective plants, requiring extensive coordination of bypass pumping and electrical/instrumentation work.

For further evidence of Award Construction's ability to safely and effectively work within an operating water or wastewater facility, please consider the following project references.

- City of Lynnwood WWTF Flow Meter Replacements
 - **Contact:** Brian Delp, City of Lynnwood, (425) 670-5224
 - PO Box 5008 Lynnwood, WA 98046
 - **Description:** Removal and replacement of the primary and secondary effluent flow meters at the City of Lynnwood WWTF, including connection to existing electrical power and instrumentation systems. Bypass piping and pumping required to facilitate replacement
 - **Completed:** July, 2012
 - **Original Contract Amount:** \$130,700
 - **Final Contract Amount:** \$133,637
 - **Electrical & Mechanical Amount:** \$106,100
 - Schedule of Values attached
- City of Redmond Town Center Pump Station Odor Control
 - **Contact:** Joe O'Leary, City of Redmond, (425) 556-2738
 - PO Box 97010 Redmond, WA 98073
 - **Description:** Construction of a media-based odor control system, wet well ventilation, PVC ductwork, electrical & instrumentation integration
 - **Completed:** November, 2010
 - **Original Contract Amount:** \$85,169
 - **Final Contract Amount:** \$85,169
 - **Electrical & Mechanical Amount:** \$55,120
 - Schedule of Values attached
- City of Snohomish Water Treatment Facility Upgrades
 - **Contact:** Karen Latimer, City of Snohomish, (360) 568-3115
 - 116 Union Ave Snohomish, WA 98290
 - **Description:** Installation of a filter to waste process, electrical and control upgrades, and painting for all four filter bays at the City's Water Treatment Facility. Components to be installed include four 2-hp pumps operated with variable frequency drives, one pump for each filter, and associated piping and electrical. The project also included the replacement of an existing control panel, electrical upgrades including a new automatic transfer switch and a new pump

control panel. A minimum of two filters remained in operation at all times with the exception of a scheduled 48 hour shutdown.

- **Completed:** July, 2009
- **Original Contract Amount:** \$336,615
- **Final Contract Amount:** \$375,196
- **Electrical & Mechanical Amount:** \$257,015
- Schedule of Values attached

We have also installed standby generators as portions of separate contracts with ATS switching:

- City of Longview Fire Station #81 Generator
 - **Contact:** Amy Blain, City of Longview, (360) 442-5206
 - PO Box 128 Longview, WA 98632
 - **Description:** Install generator pad, generator, and associated electrical
 - **Completed:** November, 2010
 - **Original Contract Amount:** \$164,493
 - **Final Contract Amount:** \$173,893
 - **Electrical & Mechanical Amount:** \$116,867
 - Schedule of Values attached
- Port of Friday Harbor Standby Generator, Night Lighting Vault, and Gate Security System
 - **Contact:** Reinhart Jung, Reid Middleton (engineer), (425) 741-3800
 - 728 134th St SW, Suite 200 Everett, WA 98204
 - **Description:** Install precast Electrical Vault (10'x6' with man door and foundation) with standby generator and replace/refurbish 5 vehicle gates and 10 pedestrian gates at live airport with associated traffic control and FOD prevention.
 - **Completed:** December, 2011
 - **Original Contract Amount:** \$726,950
 - **Final Contract Amount:** \$756,950
 - **Electrical & Mechanical Amount:** \$189,200
 - Schedule of Values attached

Thank you for taking the time to consider Award Construction as a contractor qualified to perform work for the City of Olympia.

Sincerely,

Todd Vasey
President
