## Zoning District Purposes - OMC 18.04.020.B:

**Residential 4-8 Units per Acre (R 4-8).** To accommodate single-family houses and townhouses at densities ranging from a minimum of four (4) units per acre to a maximum of eight (8) units per acre; to allow sufficient residential density to facilitate effective mass transit service; and to help maintain the character of established neighborhoods.

Mixed Residential 10-18 Units per Acre (MR 10-18). To accommodate a compatible mixture of single-family and multifamily dwellings in integrated developments close to major shopping and/or employment areas (at densities averaging between ten (10) and eighteen (18) units per acre); to provide a variety of housing types and styles; to provide for development with a density and configuration that facilitates effective and efficient mass transit service; to provide opportunities for people to live close to work and shopping in order to reduce the number and length of automobile trips; and to enable provision of affordable housing.

Residential Multifamily - 18 Units per Acre (RM-18). To accommodate predominantly multifamily housing, at an average maximum density of eighteen (18) units per acre, along or near (e.g., one-fourth (¼) mile) arterial or major collector streets where such development can be arranged and designed to be compatible with adjoining uses; to provide for development with a density and configuration that facilitates effective and efficient mass transit service; and to enable provision of affordable housing.

## Allowed Uses - Table 4.01 (excerpt):
