

## Imagine Olympia | Take Action

Action Plan - Land Use and Environment Committee June 19, 2014

## Performance Measure Criteria Checklist

Question #1: Is the performance measure significant and meaningful?	
<ul> <li>Does this measure link directly to one or more of the 20 desired outcomes</li> <li>Does this measure assist in decision-making (i.e. is it actionable)?</li> <li>Is the measure valid? Does the City or community partner output lead to a desired outcome(s)? Ask the '5 Why's,' create a 'Logic Model' or 'So That' diagram.</li> <li>Does the measure represent trends, or potentially isolated or narrow impacts?</li> </ul>	
Question #2: Is the performance measure understandable?	
<ul> <li>Does the measure need further explanation or context?</li> <li>Can the measure be described in terms of wanting it to increase or decrease?</li> <li>Can it be displayed in an easy to understand way that tells a clear story?</li> </ul>	
Question #3: Is the data for the performance measure available?	
<ul> <li>Can the necessary data be collected in cost-effective manner?</li> <li>Is the data available long-term?</li> <li>Is the measure a basic measure, composite (index) measure, or a complex measure?</li> <li>Could the data collection be replicated by someone other than the originator?</li> </ul>	
Question #4: Can the City or a community partner impact the performance measure?	
<ul> <li>Will the measure provide timely results?</li> <li>Can decision-makers, staff, or partners exert some leverage or control</li> </ul>	

over moving the measure in the desired direction (e.g. through actions)?

## Imagine Olympia | Take Action

Action Plan - Land Use and Environment Committee June 19, 2014

☐ Will this measure intentionally or unintentionally promote attention or resources away from other important programs or projects? If yes, is this okay?

Question #5: Are the set of approximately 12 draft performance measures balanced and comprehensive?

Are the five action areas addressed in a balanced way?
Are all the "key" topic areas addressed (transportation, public safety
neighborhoods, etc.)?
Can some measures be applied to multiple action areas?
Is there a variety of measurement systems represented (examples:
measurements for outcomes, cost effectiveness, number of outputs,
efficiency, quality, and satisfaction.)?
Can this list be narrowed to approximately 12 total measures?
