Hi Russ,

I just reviewed the below email from Len to you regarding the CUP extension. I have highlighted in yellow the things we need to "do" to so forward with this process. However, I don't know the order in which things must be done. The way I interpret this, we must have our phasing drawings complete before we start this process. Do you agree?

I hear you are now in AK...hope you have a safe trip home ☺

Jennifer

Subject: CUP phasing

Well, Kraig just called. He got Todd Stamm on the speaker phone and they decided that it is possible to request an administrative revision to the CUP that will be "SEPA-exempt", but will require public notification. If there is no objection from neighbors or public, they can administratively grant a time period of up to 10 years for the CUP. We will also need to propose what the phasing will look like and make sure it is approved by the staff.

All of this will require a fee to the city of \$650 maximum, filling out some paperwork, and a pre-meeting with staff to pitch our proposal for phasing. It sounds like it's fairly routine, with this caveat: if there is public objection, then the staff will require a hearing, which will add significant cost. Hopefully that can be avoided.

Hope that helps. It sounds like there's a viable strategy for phasing.

Len

Here is the information. Looks like \$650.00 plus some of Len's time. I'd say figure \$800.00.

Respectfully,
