Current Conditions Report

A current conditions report will summarize the history of Martin Way, existing land use, traffic patterns, and safety issues. Learn more about what we've discovered:

- [DRAFT Current Conditions Report \(PDF\)](#). The final version of the report is due to be released in July 2021.
- [Appendix 1: Martin Way Corridor Maps \(PDF\)](#). These enlarged maps accompany the text of the report.

- [Appendix 2: Residential Survey \(PDF\)](#). The residential survey was conducted in September 2020.
- [Appendix 3: Business Survey \(PDF\)](#). The business survey was conducted winter 2020/2021.
- [FINAL Market Study \(PDF\)](#). The market study identifies economic opportunities and constraints

Next Steps

- **Opportunities/Alternatives Analysis.** The study will consider different options for redevelopment, land use standards, and transportation facilities along the corridor, and identify a preferred alternative that incorporates public input. This analysis is scheduled for completion Fall 2021.
- **Implementation and Action Plan.** The action plan will identify strategies to address issues raised in the current conditions report and identify specific infrastructure improvements and opportunities to increase connectivity for everyone who lives, works, and travels Martin Way. The plan is anticipated to be finalized in 2022.

Background

Martin Way is a major regional thoroughfare and corridor serving the communities of Olympia, Lacey, and Thurston County. The former state highway serves as the area's primary alternative to Interstate 5, has frequent transit service, and is home to a variety of business activities and destinations. Looking forward, the corridor is forecast to grow in importance as a strategic transportation link and business destination. A comprehensive review of Martin Way's current conditions and future opportunities is underway to help guide growth to better serve the needs of the community.

The Martin Way Corridor Study will identify a common vision, as well as opportunities to develop the identity and character of the Martin Way corridor as it grows into the future. Actions may include ways to

improve safety for all users of the corridor, access to businesses, routes for pedestrian and cyclists and connections to other destinations.

The study will result in several documents and include a variety of public engagement opportunities. Additional information on each of these pieces will be posted as they are developed.
