City Council

Consideration of City Council's Shoreline Master Program Public Participation and Deliberation Process

Agenda Date: 7/10/2012

Agenda Item Number: 6.E

File Number: 12-0331

Type: decision **Version:** 1 **Status:** Passed

Title

Consideration of City Council's Shoreline Master Program Public Participation and Deliberation Process

Body

Issue:

Adopt City Council public participation and deliberation process for Shoreline Master Program update.

Staff Contact: Keith Stahley, Community Planning and Development Director

Presenter(s): Keith Stahley, Community Planning and Development Director

Land Use and Environment Committee Recommendation:

Based on the feedback provided from City Council at the June 19th City Council Study Session on the Shoreline Master Program, the Land Use and Environment Committee discussed what the next step in council's SMP process should be. The committee agreed that there should be at least two workshops. The first workshop would create a framework or common understanding of the shoreline and associated issues and the second would be a discussion about those issues, consideration of different approaches to addressing them and opportunity for interested parties to talk to each other and to City Council.

City Manager's Recommendation:

Move to approve the proposed Shoreline Master Program process steps dated June 29, 2012 and direct staff to prepare for a workshop meeting on July 28, 2012. Provide direction regarding additional workshops and council deliberations as presented in Attachment 2.

Background and Analysis:

The Planning Commission has finished its work on the Shoreline Master Program and transmitted all the background materials and information, their record and findings and recommendations to City Council for their consideration. The City Council has expressed an interest in conducting a public participation process of their own that takes into account the work that the Planning Commission did, provides an opportunity for City Council to develop a full understanding the information and issues related to the proposed SMP and provides an opportunity for additional public input and dialogue outside of a public hearing format. A list of unresolved issues is included in Attachment 1.

The Land Use and Environment Committee discussed this process at their June 21, 2012 meeting and provided staff with an outline and ideas for developing the proposed process contained in Attachment 2.

Options:

- 1) Approve proposed SMP process and direct staff to prepare for July 28, 2012 Workshop.
- 2) Approve proposed SMP process and direct staff to prepare for July 28, 2012 Workshop and additional workshops and meetings as included in Attachment 2.
- 3) Approve proposed SMP process with revisions and direct staff to prepare for the July 28, 2012 Workshop and possible additional workshops and meetings as revised.
- 4) Do not conduct July 28, 2012 Workshop and continue to consider SMP public participation process.
